RE: Federal Egg Carton Labeling Rule - With Limited Print Space

As you know, Dolco makes 6 Egg, 8 Egg and Split-6 egg cartons that have limited print space. Printing on these items is limited to the top of the carton and the inside of the lid only.

Based on a strict interpretation of the ruling and our conversation yesterday afternoon, FDA expects us to redesign the carton artwork on the top or PDP of the carton, regardless of the customer's desire for artwork appearance or their logo.

Attached are six different Split-6 carton designs for your review. Please confirm back to me that FDA believes that there is sufficient space on the PDP of these cartons to add the safe handling instruction statement on the PDP of these cartons. Also, please remember that I have *not* yet received any clear direction from the various states regarding their continued requirement to have "Keep Refrigerated At or Below 45° F" on the PDP *in addition* to the FDA labeling.

As the deadline is quickly approaching, I am being inundated with these types of requests. I want to make sure I provide accurate direction within my company in order that we comply with all federal and state labeling requirements.

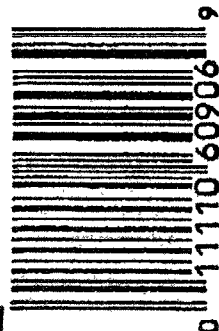

Thank you, in advance, for your help.

Best regards,

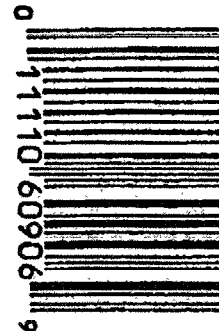

Phil Laughlin
Dolco/Decatur
